Reference for Eyleen Lee

To Whom It May Concern,

I have had the pleasure of knowing Eyleen for a number of years now. We first met so she could show me her architectural photography. I found her work to be excellent quality. She has an excellent eye for capturing the best and most important elements of her subjects. During that conversation she also showed me her artwork which I found to be very creative and interesting. So much so that I had her custom design the Holiday Card which our office circulated that year.

I have found her work to be of excellent quality and her commitment to quality in all she does is inspiring. That coupled with her seemingly limitless curiosity in the world combine to give her work a light and power all their own. I would not hesitate to recommend her for commissions of artwork or photography.

I have not been surprised in the success she has already enjoyed and I wish her every success in all she does in the future.

Sincerely,

3stones
