OBJECTIVE

I am a professional Guitarist and instructor of twenty four years looking to obtain a position as an instructor in a school, stor, and online learning platforms.

SKILLS

Teaching and Performing Advanced guitar techniques

- I am very adept at performing as well as teaching many of the more advanced techniques in the rock/pop/country genres. My specialties include string sweeping, two hand tapping up to eight finger tapping, hybrid picking, chicken pickin', and tremolo bar usage.

Personalized Curriculum

- I teach off a curriculum which I developed that uses popular songs from the past six decades as etudes to help teach scales and techniques in real world application as well as developing the ability to read rhythmic notation. Rather than teaching from a book, I use my own method which allows me to adhere the students' education to their own musical tastes.
